AVI CacheCtrl:

Custom configured software for smooth and flexible workflow

Speed:

AVI CacheCtrl allows you to batch print all of the images in a folder, camera or selection at once. Wizards allow you to quickly assemble thumbnail sheets.

Control:

With **AVI** CacheCtrl your print-out is displayed on-screen exactly as it will appear on paper. You have complete control over the size and layout of your images. Moving and resizing your images couldn't be easier, just click and drag. Or right click and choose from predefined layouts and sizes. You can also add comments and filenames to them.

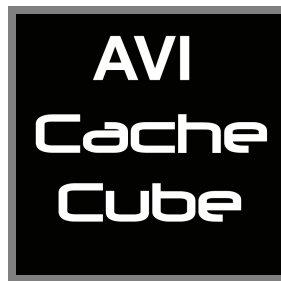

Quality:

AVI CacheCtrl creates images at the highest quality your printer can manage and WYSIWYG printing allows you to lay out your print on-screen exactly as it will come out on paper

- Easily add text and filenames to your printed images
- Built in editor lets you crop, rotate, and filter images without leaving the application.
